

Christina Vasquez, House Manager

Christina was born and raised in San Diego and grew up in a Catholic family of all girls. After receiving her BA in Psychology, she worked as the assistant manager for an Extended School Services program for ten years.

Inspired by her work with the Extended School Services, in 2015 she created her own film organization with the La Mesa Spring Valley School District in which she created short films with children in the after school programs. In addition to the work she did for her own organization, she made promotional videos for the company and schools within the district. Currently, Christina continues to work with students helping them create films, in particular a sketch comedy show with students from a local arts academy.
